Meeting CJK Standard

Bousai Fit meets the standard of CJK as a construction material that can be maintained for long time, approved by Construction Material for Long-term Use Standardization Promotion Council in Japan.

*CJK Standard is the Japanese standard for construction materials that replacement parts are available for long term.

Maintainable for Long Term

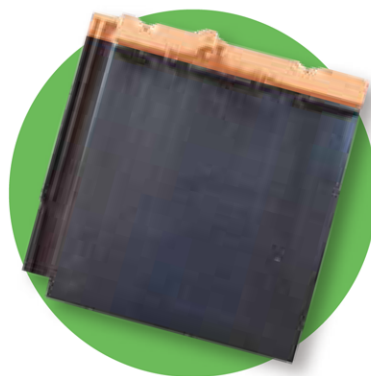

* Bousai means "disaster-resistant" in Japanese.

Strong Against Earthquakes and Storms

Feature 1

By locking the tiles with headlocks, the whole roof will be strong against natural disasters such as storms.

Simple and Ecological

Feature 3

As being the **fully flat** type of tiles, they can be installed with built-in solar panels. In addition, if you use Gable with Main Tiles and Flat Hip Tiles, the roof would be more sharp looking.

* The colors of the tiles might be slightly different from the actual products.
